FIVE CENTS

SNOW PILES UP ACROSS STATE

... Spring Storm Kills 2, Strands Many, Isolates Towns

Old Man Winter, dead but not buried, took an angry last swipe at Nebraska, piling heavy, wet snow throughout the state, whipped by swirling, gusty winds into huge 12 to 15 foot drifts which stranded hundreds of motorists and isolated scores of Nebraska communities.

More than a foot of snow buried southwestern Nebraska where the storm struck first Saturday. Winds over 50 mph pushed the moisture-laden snow across highways left hopelessly blocked for a time Sunday.

Snow piled to 12 to 15 inches at Broken Bow in central Nebraska as the blizzard moved steadily eastward in a violent pattern of rain followed by heavy snow.

The dripping wet white stuff, which fell at times in huge globs, covered eastern Nebraska during the day and into the night, with more than six inches reported at many points. The Weather Bureau indicated that depths in eastern Nebraska generally would surpass eight inches by Monday morning.

The storm claimed the life of Elmer Phillips, about 60, a farmer southwest of Lexington, Neb., who apparently became lost in the

More Weather Stories, Pages 2, 8

storm after his car went into a ditch.

His body was discovered on a county road about seven miles south of Lexington. Authorities said he died of exposure.

A Lincoln man was earlier killed when he drove off a Nebraska highway near York during the driving snowstorm.

The storm is expected to continue Monday, with a heavy snow warning of eight inches or more accumulation in the southeast issued by the Weather Bureau.

Snow flurries are expected to continue during the day in central Nebraska and snow is to continue in the east through Monday night.

Colder temperatures are due to move into the east, the Bureau said.

More than four inches were reported on the ground at Lincoln early Monday morning, although more had actually fallen, then melted.

More than two inches of precipitation were estimated from the wet fall, which continued early Monday morning.

Until the Saturday and Sunday precipitation, Lincoln had a precipitation total of only .96 inch for the month. Normal month-long total is 1.47 inches.

And, picture this. Lincoln's temperature one year ago today hit 81 degrees.

Highways into Lincoln were reported closed early Monday morning as snow plows, which had twice cleared the roads, were beaten off by blizzard conditions near the city.

Subsides In West

The storm began to let up in western Nebraska Sunday night, as Sidney, Scottsbluff and Chadron reported clearing skies.

The western two-thirds of the storm-tossed Cornhusker state—east to Grand Island—was isolated for a time Sunday, until late afternoon when the Safety Patrol reported that highway traffic on some of the lesser-hit roads was possible, but not recommended.

Airline service was completely halted. Busses which were not halted at departure points were stopped by huge drifts. Trains were delayed from one to eight hours into Lincoln.

The Safety Patrol asked all motorists to stay off all highways, some of which, although not closed, were covered with a slick, undercover of ice which formed when freezing drizzle in the east preceded the heavy snow.

Plows Busy

Snow plows were busy at the sometimes hopeless task of clearing highways. A 13-county area served by the McCook office of the State Highway Department was completely isolated.

Wind-whipped snow cut visibility to nil in outstate areas.

National Guard equipment was ordered into use by Gov. Victor Anderson in the Ogalala area where more than 200 trucks and cars were stranded by heavy drifts.

'Mile of Cars'

The Nebraska City sheriff's office reported 200 vehicles stuck in the snowdrifts.

Snow 'Great Help To Crops'

County Agent Cyril Bish called the spring snow "a great help to spring wheat crop hopes" and reported that there was "no frost in the ground in Lancaster County and the ground should soak up this moisture."

Arnold Nordquist, federal crop statistician for Nebraska, also called the late snowfall "a big boost to winter wheat prospects."

"This is a wonderful relief," Nordquist said, but cautioned that moisture will be needed "every 10 days to two weeks during the spring to make a wheat crop."

This moisture should help the wheat out of the dormant stage, he said. "We must depend very heavily on surface moisture this year because of the small amount of sub-surface moisture. This means a need for even larger amounts of precipitation than are normal."

Nordquist commented that if the heavy wet snow should sink into the ground all over the state with very little runoff. There are no parts of the state with frozen surface soil as far as he knows, the crop statistician said, and this is the perfect type of precipitation for crop prospects.

fice reported a "mile of cars" jammed on State High'ay 75 between Nebraska City and Union.

The only part of the state apparently missed by the spring storm was the northwest, where winter had earlier delivered a knockout punch of 12 inches of snow at the start of the wet and wicked weekend.

The vast northern area of Nebraska east of Valentine had received no snowfall by early Monday morning.

Norfolk reported .25 inch of precipitation in the form of rain.

Rain was also reported at Columbus and Grand Island (where .85 inch fell before it turned to snow).

Sustained flurries of wet, melting snow, varying in depth from one to six inches, were reported to have enveloped most of southeastern Nebraska.

The clinging snow, pushed by moderate wind gusts up to 35-40 mph, melted as rapidly as it fell in some areas, but in others piled up to six inches.

Driving, particularly in the urban areas, was slow due to the slushy conditions. The snow and

slush were expected to freeze early Monday morning and make driving generally hazardous.

The snow began early Sunday morning after rain and rain mixed with snow covered the area with a wet undercover which rapidly turned the heavy, wet snow into slush on city streets.

At York six to seven inches fell, preceded by .79 inch of rain. Electric power in the area was cut off for about an hour.

About five inches of snow were reported at Western. Power failed and telephone lines were out part

of the day. About 1.50 inch of rain fell earlier.

A power line was reported down west of Exeter.

More than two inches of snow fell at Wahoo. About .33 inch of rain fell earlier.

Between four and six inches of snow fell at Weeping Water. Approximately .75 of rainfall preceded the snow. Telephone service was knocked out in the area.

At Tecumseh a heavy rain—about two inches—was followed by three inches of snow.

Telephone lines were dead in

the Superior, Sutton and Wymore areas.

Telephone units were closed to Friend, Gresham, Dorchester, Nelson and other tributary lines, and Hebron reported a six-hour delay.

Strongsburg, Osceola, Seward, Nebraska City, Plattsburgh, David City, Crete and Beatrice reported approximately three-four inches of snow, while Ashland, Fairbury, Hastings and Polk reported slightly lower snow depths of one to two inches.

Hastings reported approximately two inches of snow, about an

inch of moisture and fairly heavy winds which blew down several tree branches in the residential area.

Following are snowfall reports received from around the state:

Navy Allows Peek At 'Barrier' Atlantic'

By ELTON C. FAY
Associated Press Military Affairs Reporter

ARGENTIA, Newfoundland (AP)—The Navy Sunday gave newsmen a peek at its secrecy-shrouded "barrier Atlantic," a far-flung system of radar-eyed planes and ships.

Ceaselessly in the stormy days and black nights, airmen and seamen keep vigil in mid-ocean, watching for hostile H-bombers.

A thousand times since last July, when Barrier Atlantic was set up, huge planes have headed out for their patrol stations over the ocean, accumulating about two and a half million miles of flying—equivalent to six round trips to the moon.

Adm. Jerald Wright, commander-in-chief of the Atlantic fleet and Supreme Allied Commander for the Atlantic, here to see the system at work, told visiting newsmen:

"This is to keep the guy from making an end run."

Extends Land Line

Wright meant that Barrier Atlantic is a seaward extension of the three land-based early warning lines stretched across North America to sound alarm against nuclear attack on the United States and Canada by Soviet bombers.

"If," says the Admiral, "you have a hole in your detection system or are wide open at the flanks, you have nothing at all."

The westward anchor line for Barrier Atlantic is this base in Newfoundland, one of the first built under the Anglo-American agreement of 1940. How far out and in what direction the patrol extends, officials here declined to say. However, the official Navy magazine, "All Hands," has displayed a map showing a "mid-ocean picket" position at approximately the half-way point along the 2,000-mile stretch of sea between Newfoundland and the British Isles.

Wright and Capt. Joseph C. Clifton, commander of the barrier, point out that actually the line is mobile, that "we can move this barrier anywhere."

Pacific Has Barrier, Too

A Pacific Ocean "barrier" now is beginning operation, with planes and ships operating out of Hawaii and Midway Island and connecting with operations from the Alaskan area.

A report from a barrier Atlantic plane or ship of an approaching enemy bomber force could reach and alert the entire national defense network, including headquarters of the Air Defense system in Colorado, within eight minutes.

Because the Navy cannot disclose the precise location of Barrier Atlantic, it cannot state exactly the amount of warning time this would provide the United States. Officials will say only that it would "give more warning" than that provided by the Mid-Canada Line, intermediate of the three continental warning systems, because it extends farther out than the land-based line.

(The mid-Canada line is about one hour's flight for modern jet bombers from some of the potential target cities in the northern United States.)

'Adequate'

In answer to questions, briefing officers said barrier Atlantic is "considered adequate to alert and cope with" aircraft which Russia has now or may be expected to have within the reasonable future. But they did not venture to predict that with present equipment the line should be expected to work against such weapons as ballistic missiles of the future.

Three squadrons of aircraft are used in the Airborne Early Warning (AEW) set-up. Home base is Patuxent River Naval Air Station, Md., but each squadron is rotated to Argentina for six months of patrol work, the three squadrons comprising the AEW wing—the 11th Squadron commanded by Capt. R. K. Henderson, the 13th by Capt. Otto A. Findley and the 15th by Capt. J. C. Eastman. Each squadron has about 160 officers and 650 men.

Barrier Atlantic is flown by some of the costliest warplanes in existence, in some of the world's worst weather and for flying periods exceeded in time only by strategic bombers.

'Willie Victor'

The aircraft is basically the familiar Lockheed "Connie," known to millions of commercial airline passengers. But there the likeness ends. The Navy designates it as the WV-2 (nicknamed "Willie Victor") into, on the top and on the bottom, there has been packed a multi-ton load of electronic equipment.

McCook Hit By 14 Inches

MCCOOK, Neb. (AP)—This southwestern Nebraska community was hard hit by the weekend snow storm which still continued Sunday night after having piled 12-14 inches of snow over the area. Total snowfall including the amount that melted totaled 16 inches.

Two State Patrolmen, who went out to help stranded motorists in the McCook area, got isolated themselves for a time. Sgt. Sam Janousek spent Saturday night and part of Sunday at Trenton, and Trooper Dayle Miller found refuge at a motel 5 miles north of McCook.

There was no taxi service in McCook Sunday and most churches cancelled services when townpeople were unable to leave their homes because of the heavy snow.

Station Off Air

McCook Radio Station KBRL was off the air intermittently due to power interruptions, and at Holdrege, station KUVR was off the air from Saturday night until Sunday noon due to line trouble between the station and its transmitter.

A McCook Highway Department spokesman said three persons were being sought—a family by the name of Enderers who left North Platte Saturday for McCook, and a man by the name of Mizner, who set out from McCook to go to his home 14 to 15 miles north.

More than a score of other persons were reported missing in the McCook area during the night Saturday and early Sunday, but police said they had turned up safe.

Humidity Cuts TV Programs

Excessive humidity from the snow caused interruption of programming for a four-hour period Sunday on KOLN-TV.

This was the first time snow had caused the station to discontinue telecasting, according to Harold Cook, supervisor of engineering for the station. Heavy rain and lightning occasionally cause such disruptions.

Programming was first interrupted at 10:32 a.m. when the wave signal became too weak from the transmitting station at Beaver City. A station identification slide was maintained until 12:15 when this was shut off to save wear on equipment. Regular programming was restored at 2:30 p.m., according to Cook.

Omaha television station WO-TV was off the air about an hour after a power line went out late Sunday afternoon, station officials reported.

HAYES COUNTY MAN RESCUED

Lincoln Star Special
HAYES CENTER, Neb.—The Hayes County sheriff and his patrol rescued George Jelinek, chief engineer of KHOL-TV, after Jelinek was stranded between Hayes Center and the television station during the weekend storm.

Another man was reported stranded at the television station, but he had a supply of food, so no attempt was made to rescue him.

Sheriff Aids Patient
Lincoln Star Special
NEBRASKA CITY, Neb.—Sheriff Ralph Hall took a "very sick" patient, Don Witte of Nebraska City, to the Veteran's Hospital in Omaha Sunday afternoon in an emergency call. U.S. 73 and 75 from Nebraska City to Omaha was still open but hazardous, according to the Otoe County Sheriff's office at Nebraska City.

Lancaster 4-H Club Affairs

The Panama 4-H Homemakers met on February 28. Miss Runtz was a guest at the meeting. How to make a cherry pie was demonstrated. The girls in Learning to be a Homemaker judged comforter covers. Let's Help Mother and Dad girls are decorating trays.

The Waverly Workers 4-H Club met at the home of Mary Greer. The following officers were elected: Linda Rost, president; Carol Spader, vice president; Maryl Greer, secretary; and Sally Sundeen, news reporter.

The Belting Belles held their regular meeting at the home of Jane Sandford. The lesson was on baking bread. Judy Jones, Jane Sandford, and Judy Tibert took part in demonstrating. Lemonade was made and seam finishes studied. One new member was welcomed. The Rock Creek Ranchers 4-H club met at the home of Jon Oberg. Plans for a skating party were discussed.

The Middle Creek Farmers reorganized at the home of Mr. Wm. Ellers. Ten members of the club elected Leon Meyers, president; Roger Hatzenebuer, vice president; Judy Brokhage, secretary; and Robert Wiechert, news reporter. Wm. Ellers and Ted Kossack are leaders.

The Hopalong Bunny Club held their organizational meeting at the County Extension office in the Post office building. Nine members elected the following officers: James Osborne, president; Jack Woodward, vice president; Eber Cooper, secretary; and Charles Lowe, news reporter. Mr. H. E. Pickard is the leader. The club will deal with the raising and care of rabbits.

The Stevens Creek Dairy club held its regular meeting at the Sullivan home. Six junior leaders were appointed. The sewing class determined the shape of the members face and what type of neckline to be worn. Snickerdoodle and apple crisp was made and judged by the younger members.

The Northeast Toppers met at the home of Vickie Fulton. Dorothy Chollar, a new member, was elected vice president. Share the Fun Contest and Song Contest was discussed.

The Rokeye Lassies held their first meeting at the home of Mrs. Merrill Loos. Elected officers are: Shirley Hoy, president; Carol Reddish, vice president; Diana Parry, secretary; Donna Parris, news reporter. Leaders are Mrs. Merrill Loos and Mrs. Wayne Honnor.

The Peppy Pixies met on March 6 with Cynthia Carr demonstrating how to thread a needle on the sewing machine.

The Sewell Belles met at the home of their leader, Mrs. Francis Minard with their mothers as guests. The following officers were elected: Sandra Minard, president; Janet Parks, vice president; Kathie Costin, secretary and Marjorie McMaster, news reporter.

The Clinton Gals 4-H Club met at the home of their leader, Mrs. Lester Retherford. Officers elected are: Sheryl Gardner, president; Joyce Retherford, vice president; Jane Rhoades, secretary; Alicia Peterson, news reporter.

The 4-H Pixies met at the home of their leader, Margaret Borner. A demonstration on making cocoas was given by Reed Poore. Mary Kay Arthaud showed the correct way to sweep the floor. Charles Borner gave a demonstration on planting seeds in a flat.

The Uni Place Hot Shots met on March 6 and reviewed their favorite recipes.

The Happy Helpers 4-H Club met and Phyllis Ray made snickerdoodle. A special treat is being planned for their parents at the end of their cooking project.

The 4-H Pals met at the home of Mrs. Wallace Lundein. Material for blanket protectors and silvertone ware holders was discussed.

The Randolph 4-H Five met at the home of their leader Mrs. Cliff Ig. Ambrosia and cocoas were

Teamsters In Omaha Meet

OMAHA (AP)—Harold J. Gibbons, Teamsters Union official from St. Louis, met with about 200 members here today in what he described as a "routine rank-and-file meeting."

Sessions were behind closed doors at a downtown hotel.

Gibbons, acting head of the Teamsters' Warehouse Division, declined to comment on the session here, other than to say that routine matters only were involved.

The electric and soil conservation divisions of the Rokeye 4-H Club met at the Rokeye School. Members discussed safety and wiring. Howard Rockenbach and Bob Seidell joined the club as new members. The animal husbandry section of the club met at the Harvey Damrow home.

The Rock Creek Ranchers 4-H club met at the home of Jon Oberg. Plans for a skating party were discussed.

The Middle Creek Farmers reorganized at the home of Mr. Wm. Ellers. Ten members of the club elected Leon Meyers, president; Roger Hatzenebuer, vice president; Judy Brokhage, secretary; and Robert Wiechert, news reporter.

The Hopalong Bunny Club held their organizational meeting at the County Extension office in the Post office building. Nine members elected the following officers: James Osborne, president; Jack Woodward, vice president; Eber Cooper, secretary; and Charles Lowe, news reporter.

The Stevens Creek Dairy club held its regular meeting at the Sullivan home. Six junior leaders were appointed. The sewing class determined the shape of the members face and what type of neckline to be worn. Snickerdoodle and apple crisp was made and judged by the younger members.

NU Girl Engineer Finds Men Plentiful

By NANCY BENJAMIN
Star Staff Writer

Men! All she sees all day is

June Legler is not complaining about her University of Nebraska life—and admits she is a man's field—but she does wish that at least one other girl shared her

Nebraska News

status as freshman engineering student.

Miss Legler, 17, is recipient of the Cooper Foundation engineering scholarship for \$500 a year for a four-year college course. According to engineering faculty members, she is the first girl to receive an engineering scholarship at the university.

She also has a \$100 Regents scholarship granted by the University.

Dear Sir:

The Schuyler girl commented that she might have expected that there were not many girls at the engineering college when her application letters received answers starting with "Dear Sir."

She relates that she arrived 10 minutes late for her first engineering class at the university and was met by 149 male stars.

Miss Legler was interested in

mathematics and science in high school and was undecided whether to study medicine or engineering. The engineering scholarship made the choice for her.

She still plans to use her engineering knowledge in the medical field by using chemical engineering in the field of medical technology career. "I hoped to find a girl or two in my biology lab," she explained, "but I was seated at a table with all men."

Her average is an impressive 7.5 on a nine-point grade scale, despite schedules which include two engineering courses, chemistry, analytical geometry and other brain twisters.

Busy Future

During her first semester, Miss Legler took 18 hours of courses—considered a maximum work load. The future also looks busy for her because the average engineering

student must enroll for 17 or 18 hours each semester to meet requirements.

In addition, Miss Legler is planning to take elective courses in the natural sciences to help her with her medical technology career. "I hoped to find a girl or two in my biology lab," she explained, "but I was seated at a table with all men."

Miss Legler is no longer the object of unbelieving stares from male students, and says she is now considered "one of the boys." On her part, she objects to discussing "gears and cogs" all the time.

If business continues to grow United will build a new hanger here, he said.

In the next five months United will add seven new schedules at Omaha, including the first non-stop service to Los Angeles, he said with decisions expected soon in the local service case before the Civil Aeronautics Board. United may give up some stops in Nebraska.

Discussing "feeder service" between Omaha and several smaller cities in Nebraska, Iowa and the Dakotas, Patterson said his company will ask to be relieved of such stops as Scottsbluff and North Platte if they are awarded to local service lines.

UNITED PLANS NEW OMAHA TO L.A. FLIGHT

OMAHA (AP)—United Airlines announced that on April 28 it will inaugurate its first non-stop flight between Omaha and Los Angeles. W. A. Patterson, president of United, told a group of business men here that the flight will take 5 hours and 35 minutes, cutting half an hour from the present schedule via Denver. The return flight will cut more than an hour from current schedules.

The new flight, operated with four engine DC6 equipment will leave Omaha at 5:30 p.m. (CST) daily and arrive in Los Angeles at 10:05 p.m. (PDT). The return flight will leave Los Angeles at 11:45 p.m. (PDT) and arrive in Omaha at 4:45 a.m. (CST). The plane will have a capacity of 50 passengers and 5,000 pounds of air mail, freight and express.

United also is adding flights to nearer points, Patterson said.

\$700,000 Issue

FALLS CITY, Neb. (AP)—The municipal government has called for bids by March 26 on a \$700,000 bond issue for improvement of the water and light plant and its distribution system. The bond issue may not carry an interest rate in excess of five per cent.

On Honor Roll

FREMONT, Neb.—Loren A. Korte and Marian Tellman, both of Fremont, have been named to the honor roll for the fall semester at Valparaiso University in Indiana. Korte had a perfect all-A record.

Nebraska Air Travel To See Sharp Change . . . United Head Predicts

OMAHA (AP)—The pattern of air travel in the Nebraska-Iowa area will change sharply in the next five to seven years, W. A. Patterson, president of United Air Lines, predicted.

He said by 1962 Omaha may get its first jet service and by 1965 United will have replaced its entire present-day fleet.

If business continues to grow United will build a new hanger here, he said.

In the next five months United will add seven new schedules at Omaha, including the first non-stop service to Los Angeles, he said with decisions expected soon in the local service case before the Civil Aeronautics Board. United may give up some stops in Nebraska.

Discussing "feeder service" between Omaha and several smaller cities in Nebraska, Iowa and the Dakotas, Patterson said his company will ask to be relieved of such stops as Scottsbluff and North Platte if they are awarded to local service lines.

UNITED PLANS NEW OMAHA TO L.A. FLIGHT

OMAHA (AP)—United Airlines announced that on April 28 it will inaugurate its first non-stop flight between Omaha and Los Angeles. W. A. Patterson, president of United, told a group of business men here that the flight will take 5 hours and 35 minutes, cutting half an hour from the present schedule via Denver. The return flight will cut more than an hour from current schedules.

The new flight, operated with four engine DC6 equipment will leave Omaha at 5:30 p.m. (CST) daily and arrive in Los Angeles at 10:05 p.m. (PDT). The return flight will leave Los Angeles at 11:45 p.m. (PDT) and arrive in Omaha at 4:45 a.m. (CST). The plane will have a capacity of 50 passengers and 5,000 pounds of air mail, freight and express.

United also is adding flights to nearer points, Patterson said.

Ike Accepts The Beachhead

One of the most heartening pieces of news associated with the vexing problems of the Near and Middle East came out of Bermuda when it was announced that President Eisenhower had agreed to Prime Minister Macmillan's invitation to make the United States a member of the military defense committee of the Arab pact.

Assuming a full-hearted follow-through it puts substance to the Eisenhower proposal to interpose American arms in the area in event of Russian aggression. It was one thing to declare a policy and quite another to establish a beachhead in case of the eventuality. It does not mean that American forces may ever march over the sands and arid plains of the Middle East.

Old Stamping Grounds

Nebraska Game Commission Director Steen, it is reported in the news columns, is homesick to return to Missouri as director of the Missouri Conservation Division. It ought not to be too difficult for Nebraska to arrange for his release in the event that he lands the Missouri job.

We assume Mr. Steen is a good man.

He draws a salary of \$10,500 a year as Nebraska director, only \$500 less than the governor of this state receives.

What Nebraska needs most at this time, it seems to us, is some careful thought of the salary range which it is going to undertake to maintain, particularly when it comes to key places in public places. Perhaps it is impossible to hire a director for the necessarily limited fish and

game activities in Nebraska for less than \$10,000 a year. The money, if we understand right, does not come from tax revenues but is derived from fees and licenses paid into the coffers of the Commission. Yet when we pay the head of fish and game activities \$10,000 a year, we set a certain standard for posts of greater responsibility.

Almost from Steen's arrival in Nebraska the department over which he presides has been embroiled in controversy, not necessarily his fault but nevertheless unpleasant and to some degree harmful to the activities developed.

In all of these salary matters it is important to remember we may find ourselves out on the line in bidding for services to such an extent that the public will rise up and seek to fix limitations upon salary matters.

The Things That Count

Friday the Consumers Public Power District put \$3,523,300 on the line for a turbo generator designed for installation at its Sheldon site near Hallam, Nebraska.

The generator will be built to handle either conventional or atomic power.

It was a \$3,523,300 answer to a brief wave of speculation involving (1) the relocation of the atomic plant site, and (2) the veiled intimation

Of Men And Things

In the sweet by and by, we were told last week, the Missouri River basin and presumably the ten states included in its watershed "could become as live with traffic and industry" as the Ohio River basin. The speaker was the vice president of a Kentucky oil company. The occasion was a gathering of the Missouri Basin Inter-Agency Committee.

Now we haven't any quarrel with the speaker. He was before the Missouri Basin Inter-Agency Committee to paint a pretty picture and by all the rules of the game if wishes are factories then these states bordering upon the Missouri bear testimony of thriving industry at its best. It is a rather strange thing how an inter-agency committee in St. Joe can draw attention. Only one out of ten governors of the Missouri Basin states was present to hear an address drastically changing the life and the character of this region of the Big Muddy. But the speaker quite innocently was poking a finger into a controversy which may become much more spirited than it is now. That is the use of waste and flood waters impounded behind the huge reservoirs on the upper Missouri. Now water transportation may have its appeal but we need that water in those reservoirs for irrigation and for the production of electricity, and we need it a whale of a lot more for those two objectives than we do for water transportation. In the order of priorities in most of the Missouri basin states domestic purposes stand at the top of the list, agriculture comes next, and finally industry is last. We want our industry here but we will have to have our power or an acceptable substitute for the present cheap hydroelectric power for factories.

It so happens that almost at the identical time that the wires were carrying a report of St. Joseph Missouri River Basin Inter-Agency meeting, a friend in South Dakota called by long distance telephone to discuss the same general subject. There is at this time, due to the drought which has spread itself over the Great Plains, less water in the completed reservoirs on the upper Missouri than actually was stored behind one huge dam a little more than three years ago. We have been pulling down storage to meet navigation needs in the maintenance of a Missouri River channel of fixed depth and the freight transported would not possibly compensate for the drain upon storage.

The speaker, painting that beautiful picture of a region of teeming industry supported by low cost navigation, may know his stuff but we doubt it. The Pick-Sloan dams on the upper Missouri were built primarily to eliminate the recurring devastating floods which inflicted millions of dollars of damage on the middle and lower reaches of the Missouri. Barge shipping from the Missouri's mouth near Kansas City to Omaha and Sioux City was only incidental to the larger problem of containing destructive floods, providing water for irrigation, and for the generation of cheap electricity. As chairman of a commission which made a study of the Missouri, we can say that at the time the study had been made water transportation was the least of the considerations dictating the expenditure of millions and millions of dollars in river basin development. There were other benefits of infinitely greater importance.

Here in the heart of America the need for water is so critical after months and years of drought. We should not be wasting it to provide for a six-foot channel or a nine-foot channel, whichever the navigation requirement is, 365 days in the year. We should be storing it to provide power and reserve water for irrigating land which cannot at this time be given the benefits of irrigation. We should not permit a hundred different voices to blot out the clear picture which the people of this region had in the beginning. They were thinking then of an enriched, strengthened agriculture. Much as we want industry and leave no stone unturned in order to attract it, we still want a strong, prosperous and thriving agriculture.

Irrigation And Power

In Lancaster County outside Carrier Bay Area

It means that they will actually be in a position to do so if the need arises. That is probably notice enough for Russia.

There was also a reassuring reminder to anxious America to whom news emphasis has caused the belief that the Middle and Near East is largely under Red influence.

The Arab pact includes anti-Red nations whose lands extend from the eastern Mediterranean to the western frontier of India. It includes Turkey, Iraq, Iran and Pakistan—a great share of the entire Middle and Near East. As long as this great chain of nations incline toward western cooperation not a great deal has been lost.

Assuming a full-hearted follow-through it puts substance to the Eisenhower proposal to interpose American arms in the area in event of Russian aggression. It was one thing to declare a policy and quite another to establish a beachhead in case of the eventuality. It does not mean that American forces may ever march over the sands and arid plains of the Middle East.

DREW PEARSON

Lausche Puts Heat On SEC Secretary

ers, a majority of them agreed with Armstrong.

Refugee Silberstein is an astute, fast-moving financial wizard, who during his eight short years in the U.S. has built up a corporation controlling Colt Arms, part of Pratt-Whitney (a machine-tool company, not the company that builds Pratt-Whitney engines), Elyria Foundry, Liberty Aircraft Products, Industrial Brownhoist, Quickway Truck Shovel, Hallicrafters Co., and who now seeks to acquire Fairbanks, Morse, old-line makers of scales.

FINANCIAL WIZARDRY

The three possible violations of the SEC laws which Lausche pointed to were: 1) failure to disclose promptly to the SEC and Penn-Tex as stockholders various transactions in Fairbanks, Morse stock;

2) failure to disclose certain transactions with Swiss banks; 3) failure to disclose promptly certain profits arranged by Silberstein with people he induced to buy stock.

The negotiations are complicated but important, in view of some fears that another depression might be in the offing. A big stock bubble, bursting on Wall Street, might help spark a financial toboggan.

JESUS LOVED THEM

Mary, Sister Of Martha

Mary, the sister of Martha, is sometimes called the Contemplative Mary because of her deep, meditative devotion in the presence of Jesus.

She lived with her sister and her brother Lazarus in Bethany, a village about two miles outside Jerusalem. All three were intimate friends of Jesus who showed a great affection for them, and often visited in their home with His disciples.

When Martha called upon Jesus to rebuke Mary because the latter sat listening to the Master's every word while Martha prepared supper, Jesus explained that Mary had chosen the good part, the "one thing needful."

Six days before the passover, Jesus came to Bethany with His disciples and was, as usual, invited to supper. Present at the table, in addition to Martha and Mary, was Lazarus, whom Jesus had raised from the dead.

Grateful to Jesus for His love, and perhaps sensing that the time of separation was near, Mary expressed her affection and respect in a most dramatic way.

She took "a pound of ointment of spikenard, very costly, and anointed the feet of Jesus, and wiped His feet with her hair: and the house was filled with the odour of the ointment."

Judas Iscariot muttered that this seemed a waste of money that could have been given to the poor. But Jesus silenced him with the words:

"Let her alone: against the day of my burying hath she kept this. For the poor always ye have with you; but me you have not always."

Most Catholic authorities hold that the sinner mentioned in Luke VII:36-50, Mary the sister of

"And she had a sister called Mary, which also sat at Jesus' feet, and heard his word."

—Luke X:39

we can only wish that the Gospel writers had been more explicit in identifying the persons around Jesus.

BOB CONSIDINE

President Gets Tips From Top On Golf

TUCKER'S TOWN, Bermuda — President Eisenhower took a golf lesson here the other day from one of the game's foremost authorities, iconoclasts, and gentlemen — Archie Compston.

They found it mutually rewarding. Ike got a slightly revised backswing which gave him more distance and Compston added to his imposing list of experiences with people of distinction who are attracted to golf.

"By God, he hits the ball like a man," Archie said of the President. He was touched too by the fact that Mr. Eisenhower noticed the new practice green which has been installed at the Mid Ocean Club since his last visit here in 1953.

In discussing golf in general and the President's game in particular, the towering British professional touched many bases in a talk with this reporter-hacker.

"Like millions of other average golfers, the President tries to throw the clubhead at the ball," Compston said with a touch of a sigh. "He reverses the classic order of action which outstanding golfers adhere to. The first class golfer begins his swing with attention to his left heel, then his left hip, then his left shoulder, then the heel of his left hand. All others reverse that for their detriment."

Compston was instructed to the late King George VI when he was Duke of York, also Edward VIII, when he was Prince of Wales and also the Duke of Kent, among others.

Out of it has come a state that is more than 95 per cent electrified, successfully so. Out of it has also come a verdant irrigated Platte Valley that is the pacemaker in the new Nebraska economy.

It is time to quit picking the small flaws and fostering small disputes. It is rather a time to give just credit to all the agencies which have done such a terrific job, and a time to refrain from further preaching of a calamity that is not going to happen.

Heavy Burden

In its efforts to cut back the presidential budget Congress is proposing to reduce defense appropriations by \$3.5 billion. That brought a quick rejoinder from Defense Secretary Wilson who said that it will be difficult to maintain security on the full budget request.

This present economy drive is beginning to take on the appearance of a "guns, not butter" policy, a sign that defense expenses are becoming greater than the nation can bear and still live a full national life. If the budget cannot be cut in respect to defense which is the largest item it will have to be reduced at the expense of other federal services.

Perhaps in the light of this the nation should place greater emphasis on the disarmament discussions now under way. The cost of weapons in this nuclear age is fabulously greater than during World War II. For instance when President Eisenhower, enroute to Bermuda watched a guided missile shoot down a target plane, the missile that did it cost \$60,000. At the close of WW II the shot would have been made with a \$100 projectile. The fighter plane of today costs 10 times that of its WW II counterpart, and so it is throughout the nuclear defense picture. Certainly if the cost of that is beginning to oppress this richest of all nations, it must be equally or more greatly burdensome to others.

With this held out as bait, the broadcasts from Peking threaten an all-out attack on the offshore islands, and perhaps on Formosa itself, unless Chiang and those around him agree to the terms of a merger.

Behind this threat is the fact well known on Formosa that the Communists completed on December 9 a railway and other supply lines to Amoy on the China coast which, together with completed air strips, greatly increase the vulnerability of the offshore island of Quemoy where there are still about 50,000 of Chiang Kai-shek's best troops.

Cables to the State Department raise the possibility of a show-down that would coincide with the meeting between President Eisenhower and Prime Minister Macmillan here at Bermuda.

China has long been one of the main points of difference between Washington and London. The British recognized the Peking regime as the government of China before the start of the Korean war, and they have wanted to in-

crease their trade with mainland China. Important elements in Britain have advocated from time to time that Communist China be admitted to the United Nations.

If a crisis over Formosa were to flare up as the President and the prime minister sit down together, the chances of any real reconciliation would be greatly reduced. American failure to take a strong hand to keep Egypt's President Gamal Abdel Nasser in line in the dispute over the Gaza strip and the Gulf of Aqaba has raised doubt and suspicion on the British side.

British papers have spoken of the President as a sick man while noting the fact that Secretary of State John Foster Dulles and Vice President Richard M. Nixon were both out of the country. In British eyes, it seemed that no one was on deck in Washington to cope with the Middle East crisis.

Dulles was in Australia for a meeting of the Southeast Asia Treaty Organization. At the closing session he declared the United States' strong opposition to the admission of Red China to the U.N. He said the United States had no intention of recognizing the Peking regime.

This statement was made, it is believed, on the insistence of Chiang Kai-shek. There have been intimations that United States policy was to be reversed with a recognition of the "reality" that the Communists have consolidated their power on the mainland and that Chiang, with his aging army, is a lost cause.

The British were made distinctly unhappy by the Dulles statement at the Australian meeting. They had hoped that American policy was in the process of evolution toward eventual acceptance of what they believe to be the facts of life.

LEO N. BARTUNEK

At Trail's End

Lincoln, Neb.

To the editor of The Lincoln Star: A layman is likely to wonder why a U.S. Senate committee seems to be usurping the courts in investigating organized labor's attempt to muscle in on underworld operations in Oregon. Why doesn't Oregon wash its own dirty linen? It is clearly proper for Congress to make investigations that pertain to present or proposed legislation. If the Teamster's boss has been cheating, a grand jury can indict him to the federal courts. But the Justice Department and the U.S. Supreme Court gave Joe McCarthy free rein in his days of administration acclimation. It is a questionable precedent of the three departments of government overlapping in jurisdiction with consequent waste of time and ability. The news reports make highly interesting reading. In the meantime all labor unions are getting a black eye in the public mind. It just might be that Senator McClellan's final report will clear the atmosphere and bring legislation to avert other abuses by labor leaders.

H. M. DAVIS

Day To Remember

Lincoln, Neb.

To the editor of The Lincoln Star: For Lincoln voters and taxpayers Tuesday, June 26, 1956, will always be a day to remember. On this date, a truly fantastic Authority, at a special election cost of nearly \$15,000 was submitted for voter approval. The special election results were equally surprising to the sponsors of the Authority. They lost their beloved Authority by a nearly three to one margin. So-called smart money and the bracketed intelligentsia had previously predicted a win for the multi-million dollar set-up. Its loss was a distinct disappointment.

Pre-election propaganda claimed the Authority was a perpetual panacea especially incorporated for solving all public office problems, past, present and future.

Fortunately, the voters were alerted and informed. The City Council and the County Commissioners in attempting to resuscitate this voter-fired issue by extending the corporate deadline beyond June 1, might with equal success try tossing the Rock of Gibraltar to the moon.

LEO N. BARTUNEK

Affront To The Aged

Hastings, Neb.

To the editor of The Lincoln Star: Governor Anderson is out of step with public opinion in ask-

travel easy...fly United!

WHY DRIVE? YOU CAN SAVE TIME AND MONEY ON UNITED AIR LINES

Ever think that it costs an average of 10¢ a mile to drive your car. Yet you can fly United for as little as 5½¢ a mile.

Convenient departure times, enjoy delicious food aloft at mealtimes—arrive at your destination rested and relaxed. Before planning that next trip, call United. Find out how much easier it is on you and your pocketbook when you fly United Air Lines.

POSTCARD

The thermometer leaped up to 80 degrees in Phoenix the other day. And when I came down to breakfast all the ladies had leaped into shorts.

You can fool some of the people some of the time. But you cannot fool a lady or a robin about spring.

The out-of-town newspaper say nothing about spring. I assume it is still a rumor up north.

This report comes from the Havana, Ill., bureau of the alert duck press.

It is the scientist's theory that longer days of spring (and therefore more light) "prompts them to fly north for mating."

At the same time, he dyed 200 more ducks green. The green ducks go no artificial light.

Now, if this all works out like Mr. Bellrose thinks, the pink ducks will get restless. They will begin cuffing their children and telling their doctors they feel run down.

One day they will tell Mrs. Duck: "Whyn't we go north early this year?"

And they will begin oiling the reel and tying dry flies.

The green ducks, on the other hand, will go right on taking orders and making out their income tax and planning the northern trip at the usual time.

This is an extremely scientific approach to the problem. But it has certain hazards to our own weather forecasting.

A columnist seeing a pink duck pass over Moriarty's is going to be mighty upset.

There is no telling what he might forecast.

Fortunately, the pink and green ducks are going north. Down here

Spring is usually sighted down Sixth Avenue. Around 51st.

The morning paper says that Mr. Frank Bellrose is curious to know why ducks go north in the spring. This seems a curious curiosity. But Mr. Bellrose is a waterfowl biologist at the University of Illinois.

"Bellrose dyed 200 ducks pink and set them aloft today after exposing them to artificial light during the night hours for the past six weeks."

in Arizona, we forecasters can go by the reliable signs of ladies in shorts.

I surely hope science will not come down here and dye any ladies pink or green.

Personally, I have worried about why ducks fly north. But it shows that we do not have to. Science worries for us.

I am not sure it will prove anything. For all science knows, a duck dyed pink might take off for the race track at Hialeah under the impression that he is one of the decorative flamingoes they keep in the infield.

If somebody died me pink, I think I would take off in almost any direction. I would be that embarrassed.

I should think a duck's nerves are no more stable than a man's.

This could be tested by giving half the pink ducks Miltowns and half the green ducks Equanil. A few well-screened, undyed ducks

could be given bennies and a cup of black coffee.

This would make a complicated experiment. But it would give us an idea of whether spring is for the columnists or for the birds.

(McNaught Syndicate, Inc.)

FASTEETH, a pleasant alkaline (mild-acid) powder, holds false teeth more firmly. To eat and talk in more comfort, just sprinkle a little **FASTEETH** on your plate. No gritty, good, pearly taste or feeling. Checks "garlic odor" (denture breath). Get **FASTEETH** at any drug counter.

U Of N Education Dept. To Get Federal Money

WASHINGTON (UPI) — The office of education reported that it approved 22 cooperative educational research projects during January and February.

Federal funds totaling \$416,131 were earmarked to help finance the work. Co-operating colleges, universities and state departments of education also will contribute funds.

Eleven of the new agreements concern education of the mentally retarded. The research will be conducted by Columbia University, New York (two projects); George Peabody College for Teachers, Nashville, Tenn.; University of North Carolina, Chapel

Hill; University of Texas, Austin, Wayne State University, Detroit, Mich.; University of Georgia, Athens; Southern Illinois University, Carbondale; and the Iowa, Kansas and Nebraska departments of education.

Going to move? Then notify the Circulation Dept. so you won't miss your new address.

PLAN TV WORKSHOP

MISS LUELLA HOSKINS

Delegates of nine Junior League associations from Colorado, Missouri, Nebraska, Oklahoma and Kansas will be in Lincoln this week to attend a two-day television workshop on Thursday and Friday sponsored by the national Association of Junior Leagues of America in cooperation with the University of Nebraska television department.

The workshop, the fifth of its kind sponsored by the association during the last three years, is planned to acquaint league members how best to work with local stations and community agencies and to teach the techniques of promoting, writing and producing shows.

Representing the national association will be Miss Luella Hoskins of New York City, the association's consultant on radio and television, and Mrs. Raymond C. Jopling, Jr., of Oklahoma City, director of the league's region X and member of the national board.

A former chief of the radio bureau, information service, for the American Red Cross, North Atlantic area, Miss Hoskins has been a faculty member of New York University, and has served with the Office of War Information in both New York and Egypt, with the U. S. Public Schools.

A highlight of the workshop, which will include a production

laboratory for league delegates during which they will plan and produce 15-minute programs on closed circuit of KUON-TV, will be the luncheon on Thursday at which A. James Ebel, manager of KOLN-TV, will speak on "Station Relations."

Participating in a panel discussion on television techniques will be Dr. Clarence Flick, head of the University of Nebraska radio-television; Robert Schlafer and Ronald Hull, producers-directors of the university's KUON-TV; and Jack McBride, director of educational television. University students will serve as technical assistants.

Representing commercial stations at the luncheon and program will be Frank Fogarty, WOW-TV, Owen Saddler, KMTV and Lew Jeffrey, KMTV, all of Omaha; Bob Johnson, KOLN-TV and Boyd Rooney, KUON-TV, Lincoln.

Delegates from the Lincoln League, which is active in both radio and television through its TV puppet show, the Teen Talk panel on Sundays for high school teenagers, and the In-School radio program for Lincoln grade schools, will be Mrs. David Walcott, Mrs. Robert Patterson, Mrs. John McCown and Mrs. Taylor Greer.

Arrangements for the workshop are under the direction of the Lincoln League, of which Mrs. John Mason is president.

FORUM FOUNDERS HONORED

The five women who organized the Lincoln Music Forum 21 years ago were honored at a guest night program Friday

Voters League Board Meeting

The regular meeting of the executive board of the League of Women Voters of Nebraska will be held in Lincoln on Tuesday beginning at 10 o'clock at the YWCA.

Mrs. Roy Marshall of Omaha, state president, will conduct the all-day session during which final plans will be discussed for the organization's state convention, to be held at Lincoln, Wednesday

AFTERNOON WEDDING

MRS. ARTHUR THOMAS NIELSEN

The chancel of the First Presbyterian Church at Hebron was lighted by white candles burning in branched candelabra and decorated with bouquets of white chrysanthemums for the wedding of Miss Carolyn Jean Shearer, daughter of Mr. and Mrs. Dall Shearer of Hebron, and Arthur Thomas Nielsen, son of Mr. and Mrs. Arthur S. Nielsen of Omaha, on Sunday, March 24. The 4 o'clock ceremony was solemnized by the Rev. Harry Hirsch.

Mrs. Richard Johnson of Omaha, as the matron of honor, and the bridesmaids, Miss Mary Louise Hiebenthal, Omaha, and Mrs. Charles Graham of Hebron, wore identically-styled frocks of pale blue taffeta fashioned on princess lines with flaring ballerina skirts. They completed their costumes with half-hats of taffeta, and carried bouquets of white carnations tufted with blue nylon.

Serving his brother as best man was Alfred Nielsen of Omaha, and seating the guests were Henry Bader, Jr., and Roger Haught, Lincoln, and James Knudsen, Omaha.

The bride's gown of white imported lace and silk taffeta was trimmed with tiny pearls and sequins. The jeweled motif framed the rounded decolletage of the sculptured bodice of lace, which was completed by long, tapered sleeves, and the lace extended below the waist in a peplum effect over the very full skirt of taffeta. Her illusion veil was held by a cap of jeweled lace, and she carried a white Bible ornamented with a single white orchid.

Following the reception in the church parlors, the couple left for a southern, wedding trip, later to reside in Omaha.

Both Mr. and Mrs. Nielsen are former students of the University of Nebraska, and the bride will graduate in June from the University of Nebraska School of Nursing in Omaha.

BRANIFF International AIRWAYS

ALL who know Mr. and Mrs. George B. Cook are aware that they arrived in San Francisco on Friday to spend a spring holiday weekend with their two sons, Dan and Brad, who are attending Stanford University. Those who do not know the Cooks may also be interested in what happened, considering the San Francisco earthquake.

Had things gone well with the plane which carried Mrs. Cook aloft early Friday morning, she would have been at the International Air Port in San Francisco was having an earthquake — Palo Alto remained steady—and the other, enroute to San Francisco to meet his parents during the quake just thought he was traveling over some mighty rough road.

ONE OF the April—or perhaps early May editions of Life magazine will have something that will interest all Nebraskans. Life staff writer, William Trombley, and Life photographer, Henri Cartier-Bresson, are in

Mr. Cook had flown directly

from New York City to San Francisco, arriving after the worst of the quakes, but in time to experience some of the minor ones. He sat in the air port while it shook and swayed, and was reminded of one of Nebraska's sturdiest winds as the signs flapped and banged in and out of the building.

As for the two Cook sons—one of them didn't know San Francisco was having an earthquake — Palo Alto remained steady—and the other, enroute to San Francisco to meet his parents during the quake just thought he was traveling over some mighty rough road.

ONE OF the April—or perhaps early May editions of Life magazine will have something that will interest all Nebraskans. Life staff writer, William Trombley, and Life photographer, Henri Cartier-Bresson, are in

town and already have begun work on Nebraska's Unicameral Legislature.

THIS is to be a busy week for Miss Lee Spencer whose marriage to Neal E. Harlan will be solemnized on June 1—but before we begin on courtesies for Miss Spencer we want to mention the luncheon for which she was hostess on Saturday at her home. The guest list included Miss Spencer's bridal attendants.

COMPLIMENTING Miss Spencer this evening will be Mrs. David Carr and Miss Jo Saathoff who will be hostesses at the home of Mrs. Carr. Sixteen guests have been invited for a dessert supper, and the group will present the bride-elect with a basket shower.

MISS SPENCER will be an honoree again on Thursday evening when Mrs. Garland Shields and her daughter, Sharon, en-

tertain at their home. The guest list of 30 will include members of the family and friends of the bride-elect who will be presented with a miscellaneous shower.

IN TOWN briefly on Saturday were Mr. and Mrs. Edward Mills of Barrington, Ill., who stopped off just long enough to say "hello" to old friends before going on to Beatrice.

Mrs. Mills is the former Katherine Sherwood of Beatrice.

AND arriving in Lincoln on Tuesday evening will be Mr. and Mrs. Chester Hawke of San Marino, Calif. Mr. and Mrs. Hawke, during their short stay in Lincoln, will be the guests of Mr. Hawke's brother and sister-in-law, Mr. and Mrs. Hoyt Hawke. They will leave Thursday for Chicago where they will spend the weekend, and will plane back to California from there.

Madam Chairman

Lincoln Public School Forum, 3:45 o'clock in the auditorium of the Public School Administration Building.

Lincoln Toastmistress Club, 5:45 o'clock dinner at the Capital Hotel.

AAUW, travel group, 6 o'clock dinner at the YWCA.

Chapter EE, PEO, 7:30 o'clock at the home of Mrs. Mabel Miller, 2945 Wendover Ave.

GOING TO BRAZIL

Looking forward to a trip aboard "The Brazil" on April 4 are Mrs. Richard Scott and her 16-month-old son, Phillip, who leave Tuesday for New York, where they will board the ship, for Rio de Janeiro. There they

will join Mr. Scott, who left March 15 to assume a position with the International Division of General Electric.

Mrs. Scott will actually be "going home," since she is a native of Rio de Janeiro.

WEEK-END GUESTS

In town during the week-end were James Rogers and his bride, the former Penelope Mason of Omaha, who were paying their first visit to Mr. Rogers' parents, Dr. and Mrs. E. A. Rogers, since their wedding on March 2.

Mr. Rogers, who attended the

Suburbia

Another triple treat this morning as we meet with Cotner Terrace, Northeast Heights, and Pershing Heights. In the news spotlight we find new member of the younger generation, some new residents, visitors, and several parties.

COTNER TERRACE

A new member of the bassinet set in Cotner Terrace is Miss Cynthia Susan Groathouse who made her premier appearance Sunday, March 10, at Providence Hospital. The proud parents are Mr. and Mrs. Harry Groathouse, and Cynthia at this early age has found herself surrounded by several members of the male population for she has three brothers, Harry, Steven, and David.

Grandparents of our young Miss are Mr. and Mrs. Bert Groathouse of Reynolds and Mr. and Mrs. Fred Kassebaum of Deshler.

Moving into their new home in Cotner Terrace around the first of April will be Mr. and Mrs. Rex Winders. Their new address will be 3115 Shirley Ct.

Last Wednesday afternoon Mrs. Albert Nelson was hostess to neighborhood friends, and inevitably the perking coffee pot was in the foreground. Guests for the afternoon included Mrs. Leland Ward, Mrs. Forrest Morningstar, Mrs. Wendell Sipp, Mrs. Harold Connolly, Mrs. Bill Haneman, Mrs. Donald Stinson, and Mrs. Dale Connolly.

A dessert supper was featured

The members of one of our pinocchio couples clubs met Saturday evening, March 16, at the home of Mr. and Mrs. Donald Overton. A late evening supper was served during the party, and couples included in the group were Mr. and Mrs. Lyle Stubbs, Mr. and Mrs. Robert Jacobsen, Mr. and Mrs. Richard Fulmer, Mr. and Mrs. Neil McPherson, and Mr. and Mrs. James French.

NORTHEAST HEIGHTS

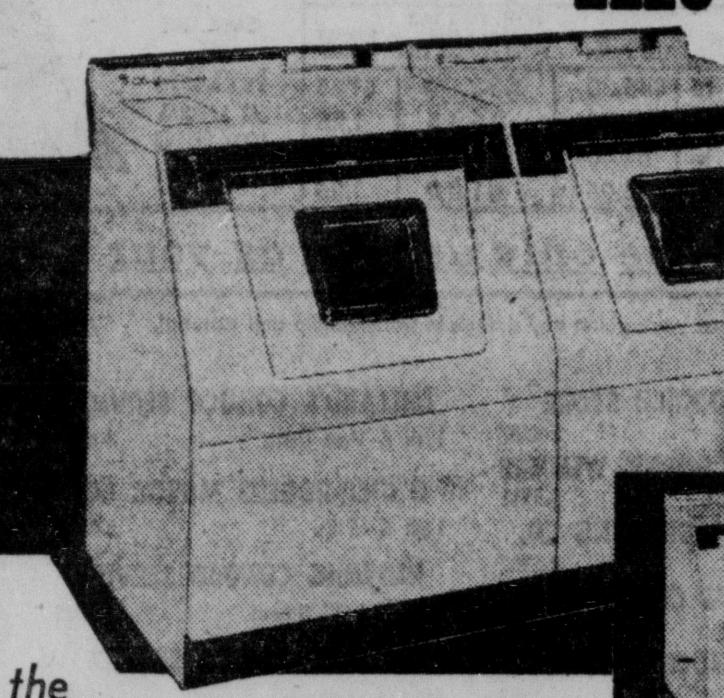

Arriving in town on Wednesday will be Mr. and Mrs. Jack Sivinski and their children, Jack, Bob, Valerie, and Dee. The family will be visiting Mr. Sivinski's brother-in-law and sister, Mr. and Mrs. Charles E. Hines.

Mr. Sivinski was recently graduated from Iowa State University at Ames, and he and his family will leave Northeast Heights on Friday for their new home in Albuquerque, N. M.

7 Gifts, 15 Purchases Added To University Of Nebraska's Art Collection

By NANCY BENJAMIN
Star Staff Writer

Norman Geske, director of the University of Nebraska Art Galleries, announced seven gifts and 15 purchases as additions to the permanent collections at the university galleries.

Presented as memorials to the late Mrs. Minnie Latta Ladd, former president of the Nebraska Art Association, were the following three:

"Nightscape", oil still life, by John Wilde, presented by Mr. and Mrs. Frank H. Woods of Chicago.

"Pieta", oil, by Leonardo Cremonini, presented by Mr. and Mrs. Thomas C. Woods of Lincoln.

"Piazza", engraving, by Rudy Pozzatti, presented by former U of N art department chairman, Dwight Kirsch.

All three works will become part of the Nebraska Art Association permanent collection as a memorial to Mrs. Ladd who died a short time before the recent month-long NAA show opened.

Other gifts to the gallery collections include the work of a University of Nebraska graduate who recently returned from two years' study in France to present a one-woman show here. Miss Carol

Haerer's "Fire Flowers", oil, is a gift, also, of Mr. and Mrs. Thomas C. Woods to the Nebraska Art Association collection.

Presented to the University of Nebraska collection by Mrs. Samuel B. Brouner of Teaneck, N. J., were:

George Constant's "Sun Bather", described by Geske as "representative of an artist known widely abroad."

Nicholas Vasilief's "Green Cloth", an oil still life, "with its rich, brilliant, extremely personal color contrasts."

Also received for the University of Nebraska collection was the oil, "Dead End" by Charles Alston, a gift of Jack Jacobs of Chicago.

Geske noted that the abundance of gifts to university collections "distinguishes this year's permanent acquisitions and shows that the university collections have achieved the status of being worthwhile receptacles for works of art in the judgment of collectors."

Purchases selected both from the 1957 NAA show and from other sources are:

Peter Blume's "White Factory", to the Nelle Cochrane Woods collection of the NAA collection, called

a "fine example of American abstract realism of the 1930's" by Geske.

Raphael Soyer's "Yasuo Kuniyoshi", also to the Woods collection, cited as "an elegant and perceptive portrait" by the art gallery director.

Raphael Soyer's "Young Woman", to the F. M. Hall collection, described as an example of "romantic realism."

Morris Graves' "Eagle of the F. M. Hall collection, "a first class example of one of Graves' best periods of painting."

Constantine Brancusi's "Head of a Girl" to the F. M. Hall collection, "one of the few sketches by the sculptor who was one of half a dozen towering figures of the 20th century." Geske said "we are extraordinarily lucky to get this."

William Scott's "Orange Still Life" to the F. M. Hall collection, "a handsome addition to our European collection" and "probably the first Scott in a Midwest collection."

Reginald Pollack's "Landscape with Figures" to the F. M. Hall collection.

Wolf Kahn's "Self Portrait" to the F. M. Hall collection. Geske called the Kahn and Pollack additions "commitments by two young artists" which were "investments in future values."

Alexander Calder's "Rooster," an ink drawing, to the F. M. Hall collection, described as "having the same whimsical outline movements of his well known mobiles."

Purchases included three other works of a former U of N art faculty member, Rudy Pozzatti, added to the F. M. Hall collection: "Enchanted Flute," a wood cut, "Ferrovia," an ink drawing, "Duomo," an engraving.

Two books, "Thirteen Poems by Owen" illustrated by Ben Shahn, and "Woodcuts and Linoleum Blocks," by cubist painter, Max Weber, were also bought for the Hall collection.

The only piece of sculpture among the permanent acquisitions is the wood carving "Horse" by an

unknown 19th century American. Geske said the carving, which evidently had once been used in a harness shop, was found in New York state.

Geske said he had "no doubt that the wood sculpture will be

come one of the most popular of satisfied."

The permanent selections and gifts were announced at an afternoon gallery talk Sunday, the closing day of the Nebraska Art Association exhibit at the Morrill Hall galleries.

Telephones Hard Hit By Storm

Service departments were kept busy Sunday repairing wire breaks and other difficulties resulting from the heavy snow and high winds.

Thirty-six communities served by the Lincoln Telephone and Telegraph Company were without telephone service Sunday. Most of these were in the hard-hit southeast Nebraska area.

Altogether, one hundred and ten long distance telephone lines were out of service, according to A. B. Gorman, of the Lincoln T&T.

In the Lincoln area, 1200 telephones, about half of them rural, were reported out of service.

Fifteen telephone cables were "out" in Lincoln Sunday, as weather caused short circuits. Cable repair crews were working Sunday night, and Gorman said service should be restored Monday.

The difficulty, Gorman reported, was not only that the wires broke, but that the snow collected on the wires and froze. The high winds caused wires to come together and thus caused the short circuits.

Wind, whipping lines heavy with ice, caused about 5000 wire breaks in a 22-county area in southeastern Nebraska, and the heavy weight on the wires also snapped 150 telephone poles.

The worst damage was reported between Dorchester and Hastings. Wires in some places were "twisted like spiderwebs," Gorman said.

By Sunday night service had been restored to six towns—Beatrice, Wilber, Plattsburgh, Nebraska City, Eagle and Elmwood—and partially restored to five—Geneva, Tecumseh, Weeping Water, Auburn and Kansas City, Mo.

Service was still disrupted to 25 towns, and Gorman anticipated it would take several days to get them all back in operation.

Consumers Public Power reported "multitudinous" calls reporting power difficulties, but that most of them were repaired shortly after they were reported.

Power was cut off for an hour or more in some parts of Lincoln, according to the City Light and Power Company.

Difficulty was generally spotted,

with no particular area of Lincoln hardest hit.

Consumers also reported power outages at Waverly once Sunday afternoon and in a part of the town Sunday night.

19 Towns Isolated On Northwestern Telephone Lines

OMAHA (P)—About 150 Northwestern Bell Telephone Co. telephone circuits were out of action Sunday night because of the early spring snow storm, Omaha District Manager G. A. Holmes reported.

He said 19 towns were without long distance service. Exact nature of the trouble at various points could not be determined until crews were able to begin work in the affected areas, he said.

Holmes listed the isolated towns as Axtell, Minden, Oxford, Alma, Orleans, Republican City, Beaver City, Wilcox, Stamford, Arapahoe, Edison, Heartwell, Hendiey, Upland, Wilsonville, Ragen, Huntley, Naponee and Norman.

Holmes said a repair crew attempted to start work in the Holdrege area but had to give up the effort due to intensity of the storm.

Crews over the state were alerted and standing by to begin work as soon as weather permitted, Holmes said.

2 State Areas Without Power

COLUMBUS, Neb. (P)—The Nebraska Public Power System Sunday night reported two service outages—one to rural customers in the Minden and Holdrege areas and another between Lexington and McCook.

An NPPS spokesman said the Minden and Holdrege rural areas had been without service most of Sunday, due to trouble on a 34,500 KV line. Crews were working out of Hastings, however, and there was a good chance of them reaching the trouble Sunday night.

NPPS said a 69,000 KV line, running from the Johnson No. 1 Station south of Lexington to McCook, also was out. Crews attempting to reach the line were handicapped by drifting and falling snow and blocked roads. NPPS said it might be Monday before the trouble could be remedied.

NPPS Sunday night also had one repair crew marooned in the Lexington-Gothenburg area, waiting out the storm.

Throughout the day Sunday, the power firm had slight interruptions in service due to sleet, and heavy icing of lines. None was serious, however.

1,589 SEE SUNDAY HOCKEY

POINT BLANK

By Don Bryant

Sports Editor, The Star

Pershing Auditorium's first presentation of hockey was impressive—and the turnout may be indicative of things to come.

Don Jewell, Pershing GM, was anxious to get a hockey match here in order to test the auditorium's ice plant, arena size and crowd reaction.

All three apparently passed the test and there's certainly a possibility that Lincoln will make some sort of effort to gain a spot in the U.S. Central Hockey League.

Despite the rainy weather some 3,200 fans turned out for Saturday night's show—mighty good, considering that hockey is not a well known sport in these parts.

Of course, Sunday's blizzard cut into matinee traffic, but the two-day turnout of nearly 5,000 is an indication that hockey might draw pretty well in the capital city.

Jewell, an advocate of hockey for Lincoln, was pleased over Saturday night's show.

"This is a wonderful turnout," he said. "I think hockey would go in Lincoln. It's a great show and the crowd seems to like it."

Walter Bush, president of the Central League which is interested in expanding to include Lincoln, was also "very pleased" over the interest in hockey shown by local fans.

The two-day attendance figure is no assurance that hockey will draw like wild-fire, just as an opening night crowd of 3,500 at Sherman Field is a guarantee of

a banner box office year for Western League baseball.

But at least there are some 5,000 Lincolners who have shown an interest in hockey.

The sport, as demonstrated here by teams from Minneapolis and St. Paul, is an exciting one and the crowd on both days got some tremendous thrills.

And if Lincoln had a team of its own, the fans would be much more vocal in support of their local heroes. The hometown flavor would be even more of a drawing card than a pair of teams meeting in an exhibition.

Hockey is a rugged sport, full of exciting action and spine-tingling thrills. It's the kind of a sport that will attract more and more fans as they become familiar with it.

That's in Lincoln's favor.

As things now stand, there is no assurance that the Capital City will field a hockey team in the semi-pro loop next year.

But a move is underway to investigate the possibilities of such a move. Judging from the two-day exhibition slate, Lincoln might be very receptive to hockey.

With a fine new auditorium, capable of housing hockey games, certainly the idea that Lincoln might be a good spot to locate a hockey team in the USCHL is worth some investigation and consideration.

In Dutch

Minneapolis goalie Marv Wyman (1) is in trouble as St.

Paul's Dutch Delmonte (17) closes in on the puck in an effort to score in the game at Pershing Auditorium Sunday. Close at hand to give Wyman some defensive help is Bill Marshall (14) of Minneapolis. St. Paul won the game, 10-8. (Star Photo).

All But 3 Chiefs In 1957 Fold

Additional signings over the weekend leave the Lincoln Chiefs just three short of having their entire 27-man roster signed for the opening of spring training Tuesday at Jacksonville Beach, Florida.

Returning signed contracts Sunday were Outfielder Frank Williams, Firstbaseman Dick Babich, Infielder Dave Brennan and Pitchers Don Urquhart and Art Murray, Jr.

Babich has .239 with 30 runs batted in for Brunswick, Georgia last year. His batting average topped the club and his 155 hits included 31 doubles.

Brennan managed a .268 average at Kinston, N.C.

Murray, a huge southpaw, was on the disabled list much of last season with arm worries but pitched at Hollywood (0-0) and New Orleans (0-1). Regarded at one time as a great prospect, Murray returned from the Army to post a 3-2 record in 33 relief jobs for New Orleans in 1955. Prior to service duty he experienced several years in the lower minors.

Berra also ended the scoreless string of the Brooklyn Cuban, Rene Valdes. His single scored Billy Martin whose double was the first hit off Valdes in eight innings with the Brooks.

Art Dimar and Bobby Shantz, former A's, pitched well for the Yankees. The former gave up six hits in as many innings and Shantz allowed only two, but one was a home run by Gino Cimoli for two unearned runs.

Dimar was a Homer by Gil McDougald off starter Bob Darnell, also reached for a double and triple by Berra, who caught the full game despite a gash on his right leg. Darnell cut him sliding into the plate in the second inning.

NIT's Most Valuable—And How!

Memphis State's sharp-eyed, springy-legged Win Wilfong (22) demonstrates one reason why he was named most valuable player

of the National Invitation Tournament as he drives past three Bradley players to sink a layup in the title game. Wilfong tallied 31 points, but his team lost, 84-83, in a thrilling contest. (AP Wirephoto).

Tighe-er Boss Predicts:

'We're Going To Have A Little Fun'

LAKELAND, Fla. — Around the Detroit camp there is talk that this is the best Tiger team since the war. Around the rest of the American League there is a suspicion that the Tigers may be the only club with a real chance to upset the New York Yankees.

Whether this optimism is real or synthetic, only time can tell. With a few minor changes, this is the same ball club that finished fifth, 17 games back, under Bucky Harris last September. Now the same players, plus some rookies and men like Jim Finigan and Eddie Robinson, are being hailed as a second-place team without ever playing a game for Jack Tighe, their freshman manager.

"I'm not predicting a pennant,"

Manager Tighe said. "Everybody else is doing that in the newspapers. But I know we're going to have a little fun."

"You never know whether Casey Stengel is kidding or not but they tell me he now mentions names and not just 'this fella' and 'that fella' when he talks about our club."

"He'll probably save all those pea throwers for us although we tailor Mr. Ford (Whitney) pretty good. Tom Sturdivant handles us pretty good and so does Bob Turley although we didn't see him much last year."

Al Kaline and Harvey Kuenn provide the solid batting punch that gave the Tigers a team average of .279, best in the league by nine points.

Lincolnite's 1,679 Good For All-Events Lead

From Press Dispatches

COLUMBUS, Neb.—Marie Maul of Lincoln took over the leadership in the all-events division of the Nebraska Women's Bowling Tournament Sunday night with a 1,679 total.

Marie, bowling for the Little Bohemia team, bowled a brilliant

591 in team competition to go with her 527 in doubles and 361 in singles. Her 1,679 was 35 pins over the previous high.

Another Lincolnite, Harriett Turner, bowled the high scratch singles score, a 581. The Straus Bros., kegler went into third place with a 590 total.

Miss Maul's effort led Little Bohemia to eighth place in the team standings.

Lincolne Donna Todd ranks 11th in the all-events standings with a 1,526.

Freeze, Cool Nerves Beat KU

McGuire Cites Control As Key To 54-53 Win

By WILL GRIMSLY

KANSAS CITY (UPI)—Coach Frank McGuire of the University of North Carolina found the formula for coining Kansas' 7-foot Wilt Chamberlain—ball control "freeze" and icy team poise.

As a result the Tar Heels today are firmly established as the nation's No. 1 college basketball team, winner 54-53 over second-ranked Kansas in a nerve-stabbing triple overtime final marked by angry exchanges and near fist fights among both players and coaches.

"We could never have beaten Kansas if we had chosen to shoot

and run with them," the dapper McGuire, who led the unbeaten North Carolinians to their 32nd straight victory, said after Saturday night's tension-loaded game at the Municipal Auditorium.

"They would have run us right out of the place. We were familiar with Chamberlain. We knew we had to control the ball and hope to cut down his opportunities to shoot. It was the only way we could have won."

With slow, deliberate basketball which had the crowd yelling its ragged, North Carolina, an underdog despite its rank, eased into a methodical 19-7 lead, lost it, fell behind by five points with less than four minutes to play, then rallied to win in the third overtime.

The Tar Heels' All-America star, Lennie Rosenbluth, was Sunday voted the most valuable player at the 19th National Collegiate Basketball Championships at Kansas City, barely edging North Carolina's Lennie Rosenbluth.

The Tar Heels of North Carolina won the tournament Saturday night, nipping Kansas, 54 to 53, in a fiercely-played triple overtime contest.

Chamberlain, the high-leaping Philadelphia All-American, was limited to six field goals and 23 points, well below his average, by McGuire's excellent strategy. Rosenbluth scored 20.

"Our boys were told to play it slow and cold and control the ball," McGuire said. "We used a collapsing zone on Chamberlain, usually had two men on him, one in front and one in back. But the thing that won for us was the tremendous poise of this team."

There were plenty of chances to panic, including the wild uprising in the second overtime period when Chamberlain and North Carolina's Pete Brennan wrestled for the ball and had to be pulled apart to keep from clashing.

Kansas' coach, Dick Harp, rushed onto the court. "I wanted to try to prevent a fight," he said later. McGuire came over from the North Carolina bench. Hot words were swapped.

Kansas said McGuire called them an ugly name. McGuire said Harp told him to "shut up." And then, the North Carolina coach said, a "big guy" on the Kansas bench belted him one in the stomach.

Porter, who was making his 10th ABC trip, opened with four straight strikes in his first game of the singles. He converted a 47 leave in the fifth frame for a spare, strung out six more strikes but left the 10-pin on the final ball.

Porter collaborated with Ted Reineke for 1,238, the highest doubles score of the day.

Don "Zeke" Zimmerman, Beecher, Ill., reigns over the all-events standings with his 1,958 of Saturday.

Porter, who was making his 10th ABC trip, opened with four straight strikes in his first game of the singles. He converted a 47 leave in the fifth frame for a spare, strung out six more strikes but left the 10-pin on the final ball.

Text Of Eisenhower-Macmillan Joint Communique Released

TUCKER'S TOWN, Bermuda (INS) — Following is the text of the communique issued Sunday at the close of the four-day meeting between President Eisenhower and Prime Minister Harold Macmillan: The President of the United States and the prime minister of the United Kingdom, assisted by the United States secretary of state and the British foreign secretary and other advisers, have exchanged views during the past three days on many subjects of mutual concern.

They have conducted their discussions with the freedom and frankness permitted to old friends in a world of growing interdependence.

They recognize their responsibility to seek to co-ordinate their foreign policies in the interests of peace with justice.

The Subjects

Among the subjects discussed in detail were common problems concerning the Middle East; Far East; NATO; European co-operation; the reunification of Germany; and defense.

The President and the prime minister are well satisfied with the results of this conference, at which a number of decisions have been taken. They intend to continue the exchange of views so well begun.

The agreements and conclusions reached on the main subjects discussed at the conference are annexed.

Annex 1

1.—Recognition of the value of collective security pacts within the framework of the United Nations and the special importance of NATO for both countries as the cornerstone of their policy in the west.

2.—Reaffirmation of common interest in the development of European unity within the Atlantic community.

3.—Agreement on the importance of closer association of the United Kingdom with Europe.

Trade Plans

4.—Agreement on the benefits likely to accrue for European and

world trade from the plans for the common market and the free trade area provided they do not lead to a high tariff bloc; and on the desirability that all countries should pursue liberal trade policies.

5.—Willingness of the United States under authority of the recent Middle East joint resolution to participate actively in the work of the military committee of the Baghdad Pact.

6.—Reaffirmation of intention to

support the right of the German people for early reunification in peace and freedom.

7.—Sympathy for the people of Hungary; condemnation of repressive Soviet policies towards the peoples of eastern Europe and of Soviet defiance of relevant United Nations resolutions.

Gaza Strip

8.—Agreement on the need for speedy implementation of recent resolutions of the United Nations General Assembly dealing with the Gaza Strip and the Gulf of Aqaba.

9.—Agreement on the importance of compliance both in letter and in spirit with the security council resolution of October 13 concerning the Suez Canal and on support for the efforts of the secretary general to bring about a settlement in accordance with its provisions.

10.—Joint declaration on policy regarding nuclear tests. (See Annex 2).

11.—Agreement in principle that in the interest of mutual defense and mutual economy certain guided missiles will be made available by the United States for use by British forces.

ANNEX 2

1.—For a long time our two governments have been attempting to negotiate with the Soviet Union, under the auspices of the United

Nations disarmament commission, an affective agreement for comprehensive disarmament. We are continuing to seek such an agreement in the current disarmament discussions in London.

In the absence of such an agreement, the security of the free world must continue to depend to a marked degree upon the nuclear deterrent. To maintain this effectively, continued nuclear testing is required, certainly for the present.

2.—We recognize, however, that there is sincere concern that continued nuclear testing may increase world radiation to levels which might be harmful. Studies by independent scientific organizations confirm our belief that this will not happen so long as testing is continued with due restraint.

Moreover, the testing program has demonstrated the feasibility of greatly reducing worldwide fallout from large nuclear explosions.

A-Test Limits

3.—Over the past months, our governments have considered various proposed methods of limiting tests. We have now concluded together that, in the absence of more general nuclear control agreements of the kind which we have been and are seeking, a test limitation agreement could not today be effectively enforced for

Science Learns How To Stop Asthma Attacks

Doctors Find New Tiny Tablet Gives Relief

In Minutes...Lasts For Hours!

New York, N. Y. (Special) — Medical science has developed a new, tiny tablet that stops asthma attacks . . . and gives hours of freedom from recurrence of painful asthma spasms.

Authoritative medical tests have proved that this remarkable compound brings blessed relief in mere minutes . . . relief that lasts for hours.

This fast-acting formula is prescribed more than any other by doctors for their private patients. And now asthma sufferers can obtain this formula —without prescription — in tiny, easy-to-take tablets called Primatene*.

New Primatene helps relieve asthma spasms these important

ways: (1) opens bronchial tubes so that breathing is natural; (2) loosens mucus congestion; (3) relieves taut, nervous tension. All this without taking painful injections, and without the inconvenience of nebulizers.

The secret of Primatene is that it combines 3 medicines found most effective in combination for asthma distress. Each medicine performs a special purpose.

Primatene is available at all drug stores. The price is only 98¢ for a bottle of twenty-four tablets. And remember — if not entirely satisfied, your money will be refunded promptly.

So look forward to sleep at night and freedom from anxiety by day. Get Primatene, today! *Trade Mark ©1954, Whitehall Pharmacal Co.

Ravenna Man Gets Year Term On Perjury Charge

Wallace A. Graham, 56, of Ravenna was sentenced to a one-year Penitentiary term by Lancaster District Judge Harry Spencer on a charge of perjury in connection with an application to sell securities in Nebraska.

Graham had pleaded no contest to the charge that on his application to sell securities for the W & M Oil Co., he verified under oath he had never been arrested, indicted or charged with a felony.

It was admitted in court he had served a penitentiary sentence on a felony charge. His attorney indicated the severity of the perjury sentence might be appealed.

Suez To Be Cleared For 10,000-Ton Ships Today

CAIRO (AP)—The U.N. salvage fleet expects to clear the Suez Canal Monday for return of oil tankers and other ships up to 10,000 tons, the medium-sized work horses of the sea.

Only the assent of Egypt's Suez Canal authority then will be necessary for vessels of that size to resume use of the 103-mile shortcut between the Red Sea and the Mediterranean.

The present limit is 2,500 tons. A final heave on the sunken tug Edgar Bonnet and fitting of pontoons to float her away will almost complete clearing of the channel closed last Nov. 1 by the debris of war.

A salvage fleet spokesman said the Edgar Bonnet, an 841-ton Egyptian vessel which went down at the center of the waterway near Ismailia, will be towed north to the Suez Canal authority workshops at Port Fouad for repairs.

Just One Left

That will leave only the 1,461-ton Egyptian Frigate Abukir, which barely failed to cork the southern entrance, as a barrier to full resumption of the canal commerce that used to average 40 ships a day. The 10,000-tonners can skirt the Abukir.

Salvage work on the frigate started Thursday. Lt. Gen. Raymond A. Wheeler, American boss of the U.N. fleet, expects it to be completed April 12. Removal of the frigate will mean that, with Egypt's approval, the biggest ships that ever plied the canal can again use its 34-foot channel.

This has special meaning for such Middle East nations as Saudi Arabia, Iran and Iraq, whose oil sales slumped when the canal closed, and for oil-short west Europeans, many under rationing, who are their biggest customers. It means the end of one phase of the Suez crisis.

The first commercial transit of the Canal since the fall shooting was made five weeks ago by the 32-ton Egyptian freighter Ramses. The Suez Canal Authority has since

lifted the size limits gradually, with provision that all the tolls be paid to Egyptian authorities. The 2,500-ton Panamanian freighter San Denis made the transit north from Suez Sunday.

Topic of Talks

Canal navigation was reported to have been the prime topic at the eight-hour meeting Saturday of President Nasser and U.N. Secretary General Dag Hammarskjold.

A responsible Egyptian source reported that aspect of the meeting—Hammarskjold's second secret conference with Nasser on his current mission to Cairo—and said Egypt will issue a detailed memorandum concerning Suez navigation before the end of March.

Hammarskjold spent Sunday morning consulting with his staff. He talked with Egyptian Foreign Minister Mahmoud Fawzi Sunday afternoon.

The Egyptian informant said Hammarskjold and Nasser will meet again Monday in what probably will be the windup of their talks on varied Middle East problems—Suez, Agaba Gulf shipping, the Gaza Strip, the future of the U.N. Emergency Force.

Nasser Had Talks

Nasser had another talk Sunday with Crown Prince Faisal of Saudi Arabia, who shares his view that Tiran Strait at the mouth of the Gulf of Aqaba is territorial water of Egypt and Saudi Arabia and that they can bar Israel from it as an enemy nation. The prince said here last week "we will accept no bargaining on this point."

Now on his way home from attending independence celebrations in Tunisia, Faisal conferred three hours with Nasser. He told reporters they discussed all matters concerning the Arabs.

There were consultations, too, in Israel, which has threatened a new war if Arab raids are resumed from the Gaza Strip or if Israeli shipping is again barred from Tiran Strait.

<table border="1

State Legislators Face Federal Funds Paradox

By ROY CAMPBELL
Star Staff Writer

The Nebraska Legislature, at this writing, has through its Budget Committee "flatly refused" to appropriate more than a half million dollars for a new building for the state employment service.

Funds for the building, though tabbed as "federal," have been built up through payments by Nebraska employers. And there are no "matching" requirements to take advantage of the money.

The situation appears to be a paradox. It points up, though, a self-proclaimed "ultra conservative" attitude on the part of state legislators. This was especially manifest in the passage recently of a resolution questioning the U.S. government on the "whole program" of federal matching funds.

Hike State Spending

The necessity of matching federal funds with state funds, the legislators noted in the resolution, caused state spending to increase and requires a higher state budget. In a period of "drought" and "hard tack" budgets, this puts an "undue" burden on Nebraska taxpayers, the senators feel.

The federal aid program for farmers, though, was not questioned. Nor was the highway matching program, although this money is derived through highway user fees in the form of taxes on gasoline, fuel oil, and vehicles.

The new building mentioned—and possibly two buildings or more—would have been paid from employment benefit funds. Employers in the state pay in one-tenth of one per cent of gross receipts to fund the program.

Pays Operating Costs

This money is rationed back to the state to pay the cost of operation of the Employment Services Division of the State Labor De-

partment. The difference in the cost of operation of the program and the money allotted—meaning a savings resulting from efficient operation—is the half million dollar figure. Actually, it is closer to \$600,000 and will be available by 1959.

State Labor Commissioner James Weasner, in an appearance before the Budget Committee, noted the new buildings—especially in Omaha—are badly needed. The lease on the Omaha building runs out in July and the building, an old one, may be torn down.

Under the new building program, the state would own the structures. Space for other offices, badly needed at present, would be available.

Also, two lots south of the state Capitol were purchased three years ago for the specific purpose of housing the State Labor Department. At present, offices of the Employment Service Division are located in privately owned buildings. The federal government pays the rent.

Only Solon OK Needed

All that is needed for the "go-ahead" on construction of the new state-owned buildings is approval of the Budget Committee, considered tantamount to an okay by the full Legislature.

The whole question of federal funds, reflected in the unicameral resolution, has plagued the Budget Committee throughout its hearings to date. Federal funds, most of them calling for state matching in varying degrees, are involved in almost all accounts.

And if the money isn't matched, the federal funds are lost. Formation, by legislative approval, even now is pending on a water pollution control commission. Close to \$600,000 a year in matching funds will be made available to Nebraska

"Either wear those suspenders the right way or I'll take them off!"

Bridge Reported Out Near Palmyra

A concrete bridge is out on the U.S. 2 detour one-half mile west and one-fourth mile north of Palmyra.

Motorists should take Highway 50 at Syracuse to U.S. 34 to bypass the ruptured bridge, Alvin Hartt, of the State Department of Roads and Irrigation, said Sunday.

A car drove over the bridge Sunday, causing it to sink some four inches. A heavy truck drove over a short time later, the Safety Patrol reported, causing it to sink still farther.

communities for pollution control.

Involved are sewage treatment plants, sewer lines, and water treatment plants. Creation of the commission, contained in LB 118, is being held up because of the \$35,000 needed to finance the commission in state matching funds.

No matching funds, no \$600,000 a year.

The problem to the senators is a tough one to solve.

'Save No Guns'

Capt. Schottler, called by Asst. State Atty. Gen. Ralph Nelson, testified he "saw no drawn guns" and "ordered no guns put away."

Skinner also admitted in his testimony that he "pulled his hair" and "cussed him out" during the return to Valentine.

Skinner resigned "under pressure" from the Patrol in June, section, too.

HOME SERVICE

Householders, movers, bonded, insured. Letting, raising, moving 2-3873 or 3-4940.
